SHINEDECOR 9350 Copper

Version	Revision Date:	SDS Number:	Print Date: 08.08.2020
3.1	12.03.2020	102000002366	Date of first issue: 09.01.2014

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name : SHINEDECOR 9350 Copper

Product code : 072923HM0

1.2 Relevant identified uses of the substance or mixture and uses advised against

This information is not available.

1.3 Details of the supplier of the safety data sheet

Company

E-mail address of person	:	msds.eckart@altana.com
responsible for the SDS		

1

1.4 Emergency telephone number

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Labelling (REGULATION (EC) No 1272/2008)				
Label elements				
Long-term (chronic) aquatic hazard, Category 1	H410: Very toxic to aquatic life with long lasting effects.			
Short-term (acute) aquatic hazard, Category 1	H400: Very toxic to aquatic life.			
Skin sensitisation, Category 1	H317: May cause an allergic skin reaction.			
Eye irritation, Category 2	H319: Causes serious eye irritation.			
Acute toxicity, Category 4	H302: Harmful if swallowed.

SHINEDECOR 9350 Copper

Version 3.1	Revision Date: 12.03.2020	SDS Number: 102000002366	Print Date: 08.08.2020 Date of first issue: 09.01.2014
Hazaı	d statements	: H302 H317 H319 H410	Harmful if swallowed. May cause an allergic skin reaction. Causes serious eye irritation. Very toxic to aquatic life with long lasting effects.
Preca	utionary statements	: Prevention:	
		P261	Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.
		P273	Avoid release to the environment.
		P280	Wear protective gloves/ eye protection/ face protection.
		Response:	
		P333 + P313	If skin irritation or rash occurs: Get medical advice/ attention.
		P337 + P313	If eye irritation persists: Get medical advice/ attention.
		P362 + P364	Take off contaminated clothing and wash it before reuse.

Hazardous components which must be listed on the label:

Copper

1,2-benzisothiazol-3(2H)-one 2-methylisothiazol-3(2H)-one

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Hazardous components

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice	: Move the victim to fresh air.	
	Move out of dangerous area. Show this safety data sheet to the doctor in attendar	ICE.
lf inhaled	 If unconscious, place in recovery position and seek r advice. If symptoms persist, call a physician. 	nedical
In case of skin contact	: Wash off immediately with soap and plenty of water.	
	If skin irritation persists, call a physician. If on skin, rinse well with water. If on clothes, remove clothes.	
In case of eye contact	 Immediately flush eye(s) with plenty of water. Remove contact lenses. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist. 	
If swallowed	 Keep respiratory tract clear. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious per If symptoms persist, call a physician. 	rson.
		

4.2 Most important symptoms and effects, both acute and delayed

Risks	:	Harmful if swallowed.
		May cause an allergic skin reaction.
		Causes serious eye irritation.

4.3 Indication of any immediate medical attention and special treatment needed

This information is not available.

SECTION 5: Firefighting measures 5.1 Extinguishing media Suitable extinguishing media : Special powder against metal fire Dry sand ABC powder Unsuitable extinguishing Water media High volume water jet 5.2 Special hazards arising from the substance or mixture Specific hazards during Do not allow run-off from fire fighting to enter drains or water : firefighting courses. 5.3 Advice for firefighters Special protective equipment : Wear self-contained breathing apparatus for firefighting if for firefighters necessary. Further information 2 Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Standard procedure for chemical fires. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures					
Personal precautions	 Evacuate personnel to safe areas. Ensure adequate ventilation. Use personal protective equipment. 				
6.2 Environmental precautions	6.2 Environmental precautions				
Environmental precautions	 Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform

		respective autho	rities.
6.3 Method	Is and material for co	ntainment and clean	ing up
Metho	ds for cleaning up	: Use mechanical	handling equipment.
		Do not flush with Contain spillage, absorbent mater vermiculite) and local / national re Soak up with ine acid binder, unive	sfer to properly labelled containers. water. and then collect with non-combustible ial, (e.g. sand, earth, diatomaceous earth, place in container for disposal according to egulations (see section 13). rt absorbent material (e.g. sand, silica gel, ersal binder, sawdust). closed containers for disposal.

6.4 Reference to other sections

For personal protection see section 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling Advice on safe handling :	Do not breathe vapours/dust. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area.
	Dispose of rinse water in accordance with local and national regulations.
Advice on protection against : fire and explosion	Keep away from heat and sources of ignition. No smoking.
	Normal measures for preventive fire protection.
Hygiene measures :	General industrial hygiene practice.
	When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.
7.2 Conditions for safe storage, incl	uding any incompatibilities
Requirements for storage : areas and containers	Keep away from sources of ignition - No smoking. Do not store near combustible materials. Keep containers tightly closed in a cool, well-ventilated place. To maintain product quality, do not store in heat or direct sunlight.
	Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Electrical installations / working materials must comply with the

Da	Impness	:	Keep in a dry, co	ol and well-ventilated place.
	rther information on prage stability	:	No decomposition	n if stored and applied as directed.

7.3 Specific end use(s) This information is not available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis	
Copper	7440-50-8	TWA (Fumes)	0.2 mg/m3	GB EH40	
		. ,	(Copper)		
		TWA (Dusts and	1 mg/m3	GB EH40	
		mists)	(Copper)		
		STEL (Dusts and	2 mg/m3	GB EH40	
		mists)	(Copper)		
silicon dioxide	7631-86-9	TWA (inhalable	6 mg/m3	GB EH40	
		dust)	(Silica)		
Further information			respirable dust and inhalal		
			which will be collected when		
	undertaken in accordance with the methods described in MDHS14/4				
	General methods for sampling and gravimetric analysis or respirable,				
	thoracic and inhalable aerosols, The COSHH definition of a substance				
	hazardous to health includes dust of any kind when present at a concentration in air equal to or greater than 10 mg.m-3 8-hour TWA of				
	inhalable dust or 4 mg.m-3 8-hour TWA of respirable dust. This means that any dust will be subject to COSHH if people are exposed to dust above				
	these levels. Some dusts have been assigned specific WELs and exposure				
	to these must comply with the appropriate limits., Most industrial dusts				
	contain particles of a wide range of sizes. The behaviour, deposition and				
	fate of any particular particle after entry into the human respiratory system,				
	and the body response that it elicits, depend on the nature and size of the				
	particle. HSE distinguishes two size fractions for limit-setting purposes				
	termed 'inhalable' and 'respirable'., Inhalable dust approximates to the				
	fraction of airborne material that enters the nose and mouth during breathing				
	and is therefore available for deposition in the respiratory tract. Respirable				
	dust approximates to the fraction that penetrates to the gas exchange region				
	of the lung.	Fuller definitions and	d explanatory material are g	iven in

Germ cell mutagenicity

Not classified based on available information.

Carcinogenicity

Not classified based on available information.

Reproductive toxicity

Not classified based on available information.

STOT - single exposure

Not classified based on available information.

STOT - repeated exposure

Not classified based on available information.

Aspiration toxicity

Not classified based on available information.

Further information

Product: Remarks: No data available

Components:

Copper: Remarks: No data available

SECTION 12: Ecological information

12.1 Toxicity

Components:

Copper: M-Factor (Short-term (acute) : 10 aquatic hazard)

Ecotoxicology Assessment

Short-term (acute) aquatic : hazard	Very toxic to aquatic life.
Long-term (chronic) aquatic : hazard	Very toxic to aquatic life with long lasting effects.
2-methylisothiazol-3(2H)-one: M-Factor (Short-term (acute) :	10

M-Factor (Short-term (acute) : 10 aquatic hazard)

: 1
