contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Use a water spray to cool fully closed containers.

#### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	<ul> <li>Use personal protective equipment.</li> <li>Ensure adequate ventilation.</li> <li>Remove all sources of ignition.</li> <li>Evacuate personnel to safe areas.</li> </ul>
	Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas.

#### **6.2 Environmental precautions**

Environmental precautions	: Prevent product from entering drains.
	Prevent further leakage or spillage if safe to do so.
	If the product contaminates rivers and lakes or drains inform
	respective authorities.

#### 6.3 Methods and materials for containment and cleaning up

Methods for cleaning up	: Contain spillage, and then collect with non-combustible
	absorbent material, (e.g. sand, earth, diatomaceous earth,
	vermiculite) and place in container for disposal according to
	local / national regulations (see section 13).

#### 8.2 Exposure controls

Personal protective equipment				
Eye protection	:	Tightly fitting safety goggles		
		Wear face-shield and protective suit for abnormal processing problems.		
Hand protection				
Remarks	:	The suitability for a specific workplace should be discussed with the producers of the protective gloves.		
Skin and body protection	:	Impervious clothing		
		Choose body protection according to the amount and concentration of the dangerous substance at the work place.		
Respiratory protection	:	In the case of vapour formation use a respirator with an approved filter.		

#### **Environmental exposure controls**

General advice : Prevent product from entering drains.
